RECESSED CEILING OR WALL MOUNT

NOTICE: MUST WEAR GLOVES.

1. Position recessed kits between joists. Make sure bar hangers are hung in the correct position. Position recessed kits temporarily by hammering "nail-in" tabs on bar hangers, then secure permanently with nails. Bar hangers should be level with bottom of joists. Adjust height of recessed kits vertically using adjusting slots and then tightening all screws on adjusting slots and bar hanger bracket to secure adjusting bracket and bar hangers. (see Fig 4)
2. Separate trim plate, press two side spring to take out the module, connect battery connectors.
3. Hang safe rope to the module clip.(see Fig 5)
4. Make proper electrical connections. If using 120VAC, connect black and white leads to the building utility. If using 277VAC, connect orange and white leads to the building utility. Cap off unused wire. (see Fig 5)
5. Assemble trim plate back use M3*15 screws. (see Fig 6)
6. Adjust position of lamp heads as needed.

NOTICE: MUST WEAR GLOVES.
